

# EXACT HYDRA

The new EXACT hydraulic pipe saw

- Endless hydraulic Power
- Safe & ergonomic work
- Easy to connect to existing hydraulics

## PipeCut Hydra

Discover a new dimension in pipe cutting with our hydraulically operated pipe saw! It cuts pipes with diameters from 75 mm to 360 mm (3" – 14") and wall thicknesses up to 20 mm in e.g. steel and cast iron or up to 45 mm in plastic. Perfect for construction sites, the saw can be connected to various types of machinery equipped with hydraulic compressors.

Optimize your work – fast, clean, and effortless!

## PipeCut Hydra

- Powerfull hydraulic motor
- Large cutting range from 75 to 360 mm OD
- Cutting up to 45 mm wall thickness in plastic and e.g. 20 mm for steel pipes
- Ideal for mobile use on any construction site

Cutting range	75 – 360 mm (3" – 14")
Max. wall thickness	20 mm steel 45 mm plastic
Suitable for	Steel, cast iron, plastics

### Technical details

Hydraulic pressure	120 – 150 bar
Oil flow	20 – 25 l/min.
Ø Blade	190 mm
Mounting bore	62 mm

Scope of delivery:  
PipeCut, user manual

## Suitable roller supports

The perfect addition to the PipeCut Hydra – the pipe support set.

The supports are specially designed for pipe diameters up to 360 mm and ensure a secure hold of the pipes during the cutting process.

Set of 3 (2 single, one double), including carrying bag.

Solutions for various pipe preparations
